

Georgia Regional Commissions Map

Regional Commissions are scheduled to replace the Regional Development Centers (RDCs) on July 1, 2009. Regional Commissions will assume the responsibilities now exercised by RDCs and will have additional authority to engage in the direct delivery of services. In conjunction with the transition, Georgia is providing additional funding to assure that Regional Commissions are financially capable of fulfilling their mission. The boundaries shown on this map were established in HB 1216, but become effective only upon ratification by each respective RDC. Check www.accg.org for additional information on the Regional Commissions as it becomes available.
